EDUCATION

Boston College, Carroll School of Management

B.S. in Management, Concentrations in Finance and Business Analytics

Boston College Track and Field

Student-Athlete

Chestnut Hill, MA

August 2021 – May 2025

Chestnut Hill, MA

August 2021 – January 2023

WORK EXPERIENCE

Freddie Mac

Quantitative Pricing Analyst

McLean, VA

January 2026 – Present

- Modeled profitability, delivery fee, and capital projections for Freddie Mac's automated underwriting platform (Loan Product Advisor), supporting pricing and product strategy across 1M+ loan applications weekly
- Built financial forecasting tools to evaluate margin sensitivity and capital impacts under varying volume and credit scenarios, informing senior leadership decision-making
- Analyzed \$50M+ in repurchase & warranty exposure to assess credit risk trends and refine loss forecasting assumptions via SQL and SAS

Multiclass Securitization Analyst

June 2025 – December 2025

- Developed proficiency in Intex to model MBS/REMICs/CMOs deal structures, project cash flows, and analyze tranche performance for Wall Street broker-dealers
- Built and deployed Python automations that streamlined team-wide data validation, reporting, and model-input workflows, reducing manual processing time by 50%
- Designed and deployed a GenAI-powered document parsing and Retrieval-Augmented Generation (RAG) system that transformed thousands of unstructured securitization reports into secure, queryable deal intelligence via natural-language interfaces

Potomac Development Group

Commercial Real Estate Analyst

Washington, DC

May 2024 – Aug 2024

- Developed financial models assessing project feasibility on a \$100M development project
- Built data models and visualizations using R and SQL to solve entitlement processes for data center contractors

Silverwood Partners

Investment Banking Summer Analyst

May 2022 – Aug 2022, May 2023 – Aug 2023

- Supported M&A transactions totaling over \$100M across the full deal lifecycle
- Created industry analyses identifying AgTech trends, increasing client participation by 20%
- Facilitated client expansion and acquisition through the delivery of market insights to C-Level Executives
- Developed 5+ Confidential Information Memorandums (CIMs) for \$100M+ transactions
- Built Python scripts for stock and crypto data extraction, integrating with Adobe for presentations

RELEVANT PROJECTS

OpenClaw

Developer

Boston, MA

January 2026 – Present

- Deployed OpenClaw AI agent gateway on a Mac Mini as an always-on home server, configuring Docker Compose for persistent operation with automatic container health monitoring
- Integrated Telegram bot channel for remote agent access, enabling natural language task execution and notifications from any device
- Configured Docker-based agent sandboxing with isolated tool execution and browser automation via headless Chromium, enforcing security policies for safe code and web interactions

RELEVANT PROJECTS (Cont.)

PovData

Boston, MA

Founder & Developer

January 2026 – Present

- Built a full-stack video processing platform using Next.js, TypeScript, and Flask to connect AI companies needing egocentric training data with contributors who record first-person footage
- Integrated OpenAI CLIP for zero-shot activity classification and YOLOv8 for real-time face detection, achieving ~30fps processing speed with automatic privacy-preserving blurring
- Designed end-to-end data pipeline handling video upload, automatic activity labeling, face blurring, and H.264 transcoding; preparing raw contributor footage for enterprise ML training datasets

FootyBanter

Boston, MA

Founder & iOS Developer

November 2025 – Present

- Built a native iOS app that lets football fans capture BeReal-style reaction photos during live matches and send "banter" to friends supporting rival teams when their team concedes
- Architected real-time backend with Firebase Cloud Functions and TypeScript to track live scores across 7 top European leagues (Premier League, La Liga, Serie A, Bundesliga, Ligue 1, Championship, and Champions League)
- Implemented simultaneous dual-camera capture using AVFoundation's MultiCamSession API; launched beta to 20+ TestFlight users with push notifications triggered by live match events

Wheredhego.com

Boston, MA

Founder & Developer

July 2025 – Present

- Designed and built a full-stack daily Wordle-style game using Flask, JavaScript, and Generative AI for dynamic content generation
- Scaled platform to 23K+ unique visitors and 500K+ page hits within three months of launch through organic growth and community engagement
- Built front-end skills through hands-on prototyping and iterative design, using AI tools to accelerate UX solutions and reduce development cycles

ADDITIONAL INFORMATION

Technical Skills: Python, LLMs, RAG, Machine Learning, OpenCV, Ollama, FastAPI, Firebase, SQL, SAS, PowerBI, Excel, Bloomberg Terminal, Cursor, Codex, OpenClaw, PuTTY, Adobe Cloud
